DIVE MASK

FULL FACEMASK RESPIRATOR

The CB40 Dive Mask is a variant of the robust CB40 respirator mask re-engineered to meet the demanding requirements of the both sports and professional divers.

Distortion-free visor with unique anti-fogging system – even in extreme low water temperatures approaching freezing point.

The proven faceseal combines with deep chin cup to aid stability and ease of location in donning the facemask.

Key features

- Polycarbonate visor with frosted sides to prevent reflections
- Anti-fogging system even at low water temperatures approaching zero
- Unique reflex edge seal provides excellent seal under all dive conditions
- Deep chin cup aids location and provides comfort and stability
- External buoyancy compensating weights attachable to the visor
- Available as Open Circuit demand breathing system or Closed Circuit re-breather system
- Accepts all standard communications systems
- Customised to fit standard 2nd stage demand regulators or LAR V re-breather dive block
